SUMMARY

Software / Backend Engineer with 3+ years building production services, REST APIs, and data systems in Python, C#, and Java across AWS and Azure (including 1+ year as a Software Engineer in India). I design and optimize SQL schemas and APIs, build ETL pipelines processing 8M+ rows/day, and ship clean, well-tested code with Docker and GitHub Actions CI/CD. I also integrate the Claude API into production workflows, own work from requirements through deployment, and communicate clearly across technical and non-technical audiences. MS in Computer Science.

SKILLS

Languages: Python, C#, Java, C++, Bash, PowerShell

Backend & Web: REST API design, Flask, React, async API integration, unit testing (pytest)

Data & Pipelines: SQL Server, PostgreSQL, MySQL, Sybase, ETL, SSIS, AWS RDS, schema design, query optimization

Cloud: AWS (EC2, RDS, S3), Azure IaaS, Azure AD SSO, UNIX, Windows Server

DevOps: Docker, GitHub Actions CI/CD, Azure DevOps, Git, Agile/Scrum

LLM & AI: Claude Code (Anthropic), Claude API, prompt engineering, agentic workflow design

Security: Splunk SIEM, log analysis & detection, MITRE ATT&CK, incident response, firewall log analysis, CIS Level 1, TCP/IP, DNS, HTTP/S

Visualization: Tableau, Chart.js, interactive dashboards

EXPERIENCE

Unique Design Inc., Secaucus, NJ - IT Analyst

Apr 2025 - Present

- Designed and refactored C# modules and Bash scripts on UNIX/Windows that query SQL Server and PostgreSQL for documents and metadata, reducing retrieval latency by 60%.
- Developed and debugged services across development, test, and production environments while maintaining 24/7 operational reliability.
- Built and automated end-to-end ETL pipelines (SSIS) from Sybase/PostgreSQL into AWS RDS, processing 8M+ rows daily and powering Tableau dashboards used by 250+ users.
- Integrated SIEM and incident data into pipelines and dashboards, turning raw security logs into KPIs that support triage and reporting.

Dianco Inc., New York City, NY - Developer / IT Administrator

Mar 2024 - Apr 2025

- Built SSIS packages and SQL logic to synchronize PostgreSQL e-commerce data into SQL Server, reducing synchronization errors by 95% and saving 10 hours weekly.
- Wrote Python automation for firewall log parsing, enabling incident detection in under 5 minutes via Splunk notifications.
- Configured Azure IaaS and Front Door CDN and applied CIS Level 1 hardening to maintain 99.25% uptime for scalable, customer-facing services.

iTechNuts Solutions, Ahmedabad, India - Software Engineer

Jan 2021 - Mar 2022

- Developed and shipped gameplay features and backend logic for educational mobile games on the Apple App Store and Google Play, collaborating with designers on user-facing experiences.

PROJECTS

AI-Powered Log Analyzer - Python, Docker, PostgreSQL, CI/CD | github.com/Romil2112/log-analyzer

- Built an end-to-end Python data pipeline ingesting and scoring log data with Isolation Forest, persisted to PostgreSQL; integrated the Claude API with async calls and prompt engineering for structured output.
- Deployed with Docker Compose and GitHub Actions CI/CD running 103 pytest tests, with Chart.js dashboards.

SOC Dashboard - Python, Flask, PostgreSQL, Chart.js | github.com/Romil2112/SOC-Dashboard

- Built a full-stack app: Flask REST backend serving metrics to an interactive Chart.js front-end, with clean separation of data, API, and presentation layers.
- Designed SQL schemas and aggregation queries for SOC KPIs (MTTR, SLA breach rate, escalation rate) with interactive filters and time-series charts.

EDUCATION

Stevens Institute of Technology, Hoboken, NJ

Jan 2022 - Dec 2023

MS Computer Science; Graduate Certificate in Cybersecurity

Marwadi University, Rajkot, India

Jun 2018 - May 2021

Bachelor of Computer Applications
